## Sheet Lead

Medi-Ray produces a wide range of lead materials in sheet form for the shielding of nuclear medicine facilities and X-Ray rooms. Sheet lead shielding material is Sheet Lead & Foil available in thin antimonial lead foils that adapt well to thin contoured applications such as electrical shielding. Sheet lead is also available in thicknesses well suited for walls, doors, and ceilings.

## Lead Lining

Medi-Ray's line of adhesive-backed lead sheeting enables a manufacturer to effortlessly construct a custom shielded container by simply cutting the sheet lead with scissors or a razor knife and applying it to foam packing material.
