Applications of Lead Counterweights

- [Lead counterweights](#) have been developed for automotive, marine, environmental equipment, construction equipment, scientific laboratory applications and even recreational use.

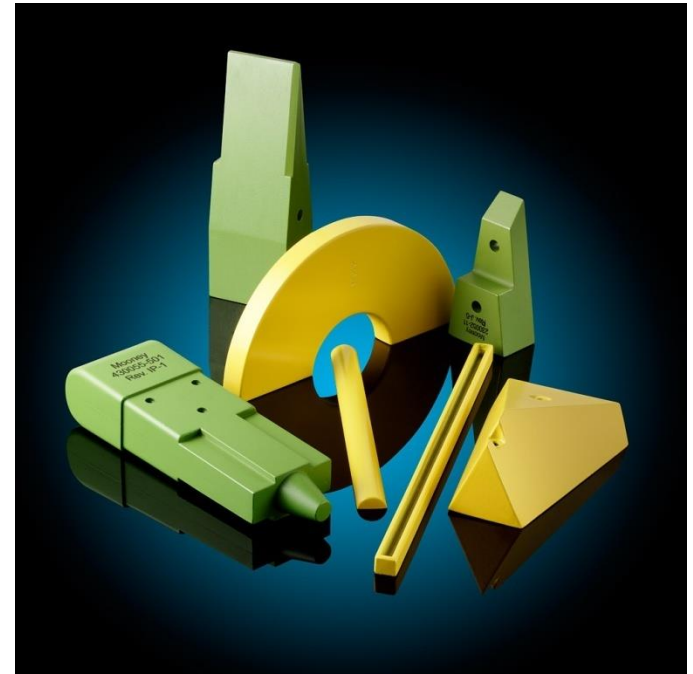

Other Applications

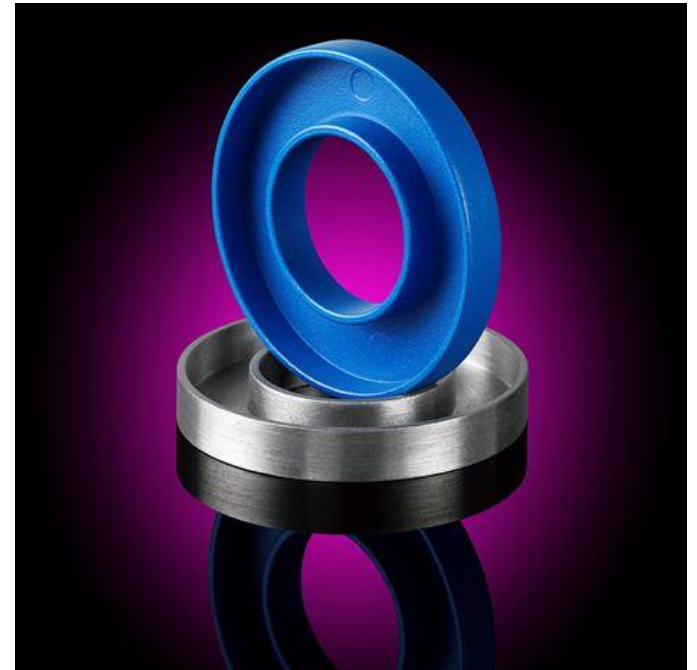

- Elevator weights
- Lead sash weights (windows)
- Stage and theater weights
- Ballast lead weights
- Aerospace counterbalance weights
- Curtain weights
- Divers weights
- Boat keel weights
- Race car ballast weights
- Flagpole weights

- Lead counterweights are typically 40% heavier than steel counterweights.
- This allows **lead counterweights** to fit in smaller spaces and have lower centers of gravity.
- This allows flexibility as to how the counterweights are positioned, due to the smaller space that it inhabits.

- If you need custom designed lead counterweights, [contact Medi-Ray™](#).
