Medi-Ray™ is devoted to innovation in lead metal technology. Since 1974, Medi-Ray™ has been the largest supplier of radio-pharmaceutical shipping containers.

Medi-Ray™ has several custom lead brick configurations that can be altered to a customer's requirements and provided in pure lead or antimonial lead. Its cost effective production techniques has resulted in the lowest lead brick prices available.

Lead Bricks...

- Lead bricks are typically used in reactors for radiation shielding.
- Lead bricks have the thickness to shield against high intensity radiation produced in reactors.

Types of Lead Bricks Manufactured by Medi-Ray™

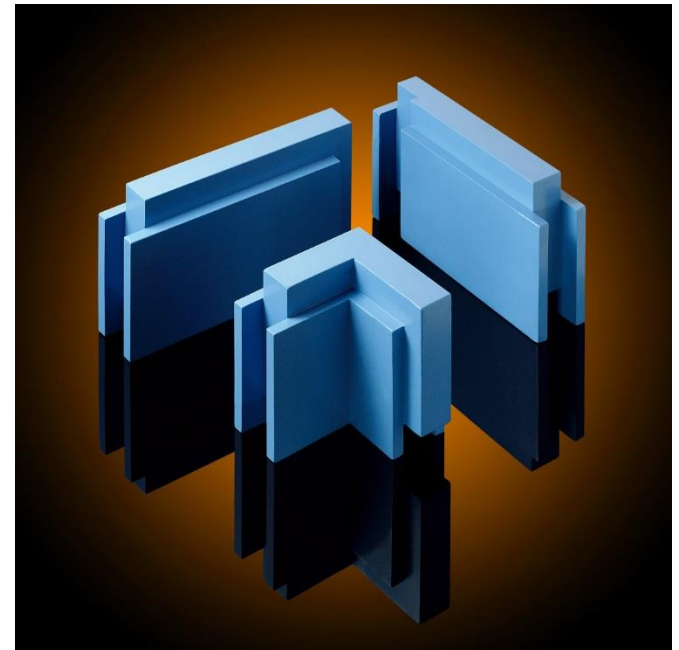

Standard Rectangular Lead Bricks

- These lead bricks are for standard shielding wall formation.
- The fit and finish of each lead brick yields the finest shielding characteristics available.

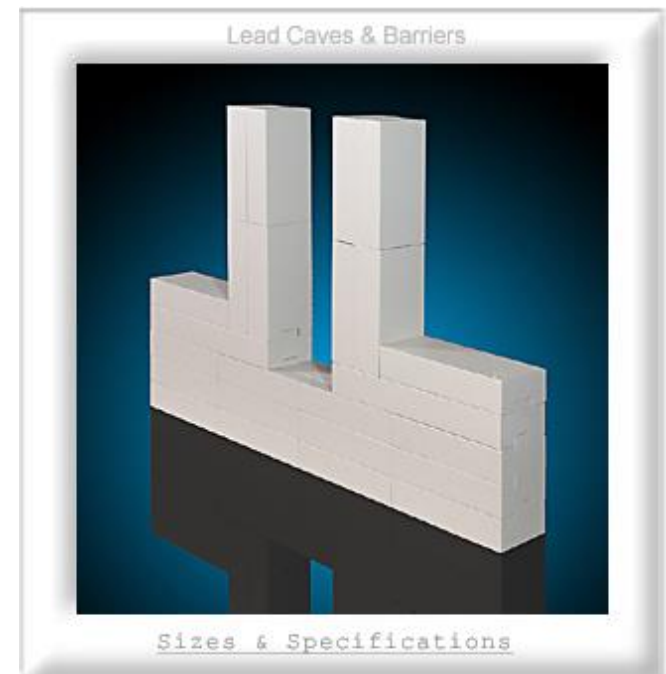

Interlocking Lead Bricks

- These lead bricks are used in the corners and other joints of the basic [lead shielding](#) wall.

Lead Barrier Walls and Caves

- Using standard rectangular lead bricks and interlocking lead bricks, a wall or cave can be formed so they can be fitted directly in the area of shielding.

Dura Block Custom Lead Bricks

- This type of [lead brick](#) has an interlocking system that attaches the bricks together.
- This assures strong shielding from harmful radiation.
