- From medical to industrial situations, there is a dire need for the application of lead lined products in radiation shielding.

Fields where Lead Lined Products are Used

Lead products used for radiation shielding can keep healthcare workers and their patients safe from harmful rays. This includes anyone working in the veterinary, dental, and medical professions.

- The need for **lead shielding** in nuclear power facilities is intense. Powerful gamma and neutron radiation can be extremely harmful if not contained.
- This includes protecting the surrounding environment, as well as any transportation needed to move radioactive materials.

- [Lead shielding](#) is also important to the defense industry. Radiation shielding for defense purposes must be extremely strong, due to their long periods of time submerged in water.
- Lead products used within the defense industry may include lead wool, and lead bricks.

Medi-Ray™ is devoted to innovation in lead metal technology. Since 1974, Medi-Ray™ supplies all standard lead lined products and lead bricks with interlocking features.
